

ABOUT US:

Crossroads Engineering delivers trusted forensic engineering and expert analysis of residential and commercial properties for insurance professionals, law firms, corporations, and property owners. Based in New England, we provide fast, reliable service and clear, defensible findings grounded in sound engineering principles.

Our work is thorough, objective, and ethical—giving clients the technical insight they need to resolve disputes, manage risk, and make confident decisions.

DAMAGE ASSESSMENTS

CAUSE & ORIGIN INVESTIGATIONS

- **Structural Integrity** – framing, decks, balconies, chimneys
- **Building Envelope** – siding, cladding, water intrusion, roofing, ventilation
- **Construction Defects** – structural, envelope, and design-related issues
- **Weather & Natural Events** – wind, hail, hurricanes, tornadoes, earthquakes, snow & ice, etc.
- **Impacts & Vibration** – vehicle & tree impacts, vibration-related damage
- **Fire & Loss Analysis** – fire damage
- **Repair Recommendations** - code requirements, code upgrade analysis
- **Moisture Intrusion** – identifying leaks, moisture damage, & hidden sources of deterioration
- **Suspected Weather-Related Losses** – assessments for suspected wind, hail, tornadoes, earthquakes, and related events
- **Foundations & Settlement** – diagnosing movement, cracking, and structural stability concerns
- **Snow & Ice Loading** – evaluating roof performance and structural safety under winter conditions
- **Vibration Impact** – claims from blasting, heavy traffic, and nearby construction activity
- **Civil Site Issues** – site grading, stormwater, groundwater, septic systems

A STRONG FOUNDATION FOR EVERY DECISION, TODAY AND FOR THE FUTURE.
